Thinking Forward showcases local professional speakers focused on helping their audiences adapt to change. Six creative thought leaders will deliver fresh ideas about adapting to the ever-changing issues we confront in the workplace and beyond. These professional speakers will inspire, motivate and empower you to transform the organizations in which you work and volunteer. Representing a variety of personal and business topics, you will hear speakers who energize audiences at corporate or organizational meetings, conferences and events.

Are you ready to take on whatever comes your way? Is your brain bursting with new ideas and resources? Are you committed to changing the way you think, so that you can think about what you want to change? Good. Then our relationship with you has just begun...
